👤 PROFILE

Highly motivated and skilled Full Stack Web Developer with experience in building responsive and user-friendly web applications using a variety of programming languages and frameworks. Proficient in front-end technologies such as HTML, CSS, JavaScript, and React JS as well as back-end technologies such as Node JS, Next JS, and Express JS. Strong knowledge of database design and management with experience in MongoDB databases. A quick learner with excellent problem-solving skills and a passion for building innovative and scalable applications. Seeking a challenging role to utilize and enhance my skills in a dynamic and collaborative environment.

📁 EMPLOYMENT HISTORY

Waiter, Bartender, Host, Supervisor at Flat Iron - Steak House, Covent Garden - London
December 2021 — February 2023

Started as a waiter and quickly transitioned to bartender, mastering cocktail preparation, inventory management, and mentoring. Expanded responsibilities to include hosting, resolving customer/system issues, and assisting colleagues. Worked 50-70 hours per week. Declined assistant manager positions to pursue my passion for web development in an upcoming Full Web Development Bootcamp.

This experience developed exceptional customer service skills, adaptability, and teamwork mindset. Transitioning from hospitality to web development aligns with my true ambitions.

🎓 EDUCATION

Bootcamp, University of Edinburgh, Scotland

January 2023 — April 2023

Full Stack Web Developer Bootcamp Graduate HyperionDev

During this intensive program, I developed a strong foundation in web development with a focus on both front-end and back-end technologies. Through a series of individual projects, I gained hands-on experience in developing web applications from ideation to deployment. Additionally, I had the opportunity to participate in various coding challenges and hackathons, where I further developed my problem-solving abilities and learned to work efficiently under pressure.

- Built using Express, React, and MongoDB (the MERN stack).
- Reads, updates, and deletes (CRUD) information from MongoDB.
- Custom server built using Express.
- Security Helmet, and bcrypt.

highschool, Eprami - Escola de ensino superior do Alto Minho Interior, Monção

September 2008 — June 2010

Two years of Computer Science level 2, where we learned about hardware and software.
